

Model ARM-5000

One Miniaturized Escrow...Four Different Positions.

The ARM-5000 is a compact escrow made possible by the use of a small DC solenoid. Due to its size a variety of applications are possible with the Amusement, Gaming & Vending industries.

Features:

The ARM-5000 offers four (4) choices of direction. Changing the position of the crank cam, which is rotated by the solenoid, four (4) locations can be chosen from the two flaps (as shown in Diagram 1A below).

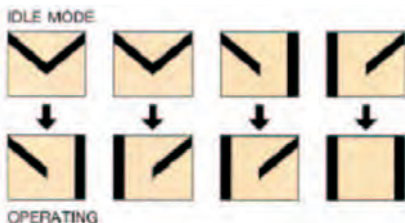

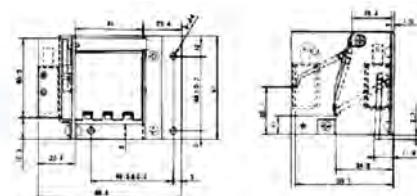

Diagram 1A (Positions)

General Specifications:

- **Capacity:**
5pcs. US 5¢
- **Distribution Method:**
DC Solenoid
- **Distribution Directions:**
Right & Left
- **Voltage:**
12VDC
- **Current Consumption:**
384mA Maximum
- **Position in Use:**
Upright or within 2° in any direction.
- **Weight (Approximate):**
0.55lbs.
