

This addition to the SH-300 hopper range has been designed incorporating features to increase it's ease of use in various applications.

As with other hoppers from Asahi Seiko, a slide mount means fast hopper removal and ease of maintenance. In addition to the slide mount the SH-350 has a front mounted handle to aid this process further.

FEATURES

- Built in motor brake and auto-reverse mechanism helps to achieve excellent dispensing performance
- Easy bowl removal for cleaning/ maintenance
- Slide mount and handle
- Standard discs easy to remove or exchange without the need for special tools or equipment

OPTIONS

- Extension heads to increase capacity

TECHNICAL SPECIFICATIONS

- **Applicable Coin Size:**
Applicable Coin Size:
Diameter: 16.25-28.5mm
Thickness: 1.3-3.1mm
- **Dispensing Speed:**
Up to 600 coins per minute (approximately)
- **Coin Capacity:**
Coin Size (example) Head Capacity 25mm diameter 210 coins (approximately)
- **Coin Counting Method:**
Proximity Sensor
- **Motor Control:**
Dedicated Control Board using CCTalk
- **Motor Voltage:**
24VDC + 10% - 0
- **Continuous Operation:**
10 minutes max
- **Current Consumption:**
230mA (operating) / 2.0A (stall)
- **Operating Temperature:**
-10°C to +50°C
- **Weight:**
1kg (approximately)
