

The WH-3 was developed specifically to handle the large \$1 (38mm) casino type of token. It has a capacity of 550 large coins and a dispensing speed of 310 - 900 coins per minute dependant upon coin diameter.

#### FEATURES

- **HIGH SPEED, SMALL COIN DISPENSING**

As a result of the development of the WH-3 for 38mm, we found that we could dispense US 25¢ size coins at 50 pieces per 3.5 seconds while maintaining an accurate count with our 'no maintenance' proximity sensor.

- **DISPENSES UP TO THE LAST COIN**

All coin sizes dispense to the last coin and are 100% disc efficient, which means you do not have coins missing on the disc as it dispenses.

- **STATE OF THE ART HOPPER**

Developed from our proven WH-1 design, but made to handle a much wider range of coins at a higher speed. It is revolutionary in its ability to dispense large coins & remain so small in size.

#### GENERAL SPECIFICATIONS

- **Applicable Coin Sizes:**  
Diameter: 24.3mm ~ 39.0mm  
1.6mm ~ 3.3mm
- **Coin Capacity (Examples):**  
30.8mm Diameter: 550 coins (US 50¢)  
38.0mm Diameter: 220 coins (Casino \$1 Token)
- **Dispensing Speed (Approximate):**  
US 25¢ - 1,500 coins/minute\*  
US 50¢ - 900 coins/minute  
US \$1 - 310 coins/minute

\* Dispensing speed may vary depending on motor gearbox deceleration ratio or coin specifications.

- **Coin Counting Method:**

Proximity Sensor

- **Motor Voltage:**

24VDC

- **Current Consumption:**

24VDC: 4.0A  
(when stopping operation)

- **Operating Temperature:**

-10°C ~ +60°C

- **Weight:**

Approx. 5.73 lbs.
