

Model CD-1100

Model CD-1300-340

As shown below, these highly flexible dispensers can accommodate multiple capacity stack heights and incorporate a quick release feature for ease of attaching and removing the cartridge

The CD card dispenser series covers a diverse range of applications from plastic telephone cards and paper debit cards to pull-tab, break-open style tickets and scratch cards. These dispensers have an excellent reputation for high quality and reliability throughout the world. Used in a variety of applications including Transportation & Vending.

Features:

The CD-1100 model handles Pull Tab or Break Open tickets. It can dispense cards of varying thickness and holds up to 1,000 pieces in an easy load cartridge.

The CD-1300 is designed specifically for the redemption industry. It is an excellent alternative to redemption tickets.
